Celebrating success and raising hopes for a better future

Annual Review 2012
Foreword by the Chairman

The theme of our 2012 Annual Review is “Celebrating success and raising hopes for a better future”.

We feature stories from fundraisers whose dedication has helped to finance essential research, learn from the scientists that we are funding and from some of the children and families affected by childhood cancer.

Research has never been more necessary. Around 300 children and young people are diagnosed with cancer every month in the UK and the incidence is still increasing.

We know how important it is to give children a better chance in the fight against cancer but also to help families affected by the disease. In addition to funding research, we support families through welfare projects, including partnerships with hospices and other organisations.

There is still so much more that needs to be done. With your generosity we will continue the fight against all forms of childhood cancer. As we celebrate our 25th anniversary during 2013, we acknowledge with thanks our many supporters and look forward to working with you to save more young lives.

Eddie O’Gorman OBE
Chairman of Trustees

Welcome from Scarlett

Scarlett was diagnosed with acute lymphoblastic leukaemia in January 2011. She is shown on the front cover of this report with her mother, Bryony, at our Zippos Circus family event when she was mid-treatment.

Bryony raised a fabulous £21,858 by running for Children with Cancer UK in the 2012 Virgin London Marathon. We are hugely grateful to Bryony and everyone who has supported the fight against childhood cancer over the past year.

Hello, my name is Scarlett. I am eight years old.
I had leukaemia for two years. I fell ill when I was six. In my two years of treatment I have been visiting lots and lots of money to help other children with cancer. I went olive picking in Italy and made olive oil to sell. Recently me and my brother Finn got money from our school charity sale. He raised £500! My Mum and I also ran the London marathons for Children with Cancer. We went to watch her and I was really proud to see her at the finish with her medal.
I had my last chance in March this year. I am starting to feel a lot better and I am really happy not to have to go to hospital any more.
I thank you for helping children like myself.
Love from Scarlett xx 04/04/10

www.childrenwithcancer.org.uk
As we reflect on our first quarter century, we never forget how we began - and why. 14 year old Paul O’Gorman died in February 1987, only nine weeks after his initial diagnosis of leukaemia. Before Paul died he asked his parents, Eddie and Marion, to help other children with leukaemia. His sister Jean died just nine months later, also of cancer.

What began as a small memorial charity has evolved into a major force in paediatric oncology. Since our inauguration in 1988, thanks to your support, we have raised over £150 million to help the fight against childhood cancer.

We fund life-saving research into the causes, prevention and treatment of childhood cancer.

We fund innovative welfare projects to provide better care for young cancer patients and their families.

We campaign to raise awareness of childhood cancer to protect more children and to improve the lives of young cancer patients, today and for future generations.
About childhood cancer

Many people think that cancer is an older person’s disease. But every year, over 3,500 children, teenagers and young adults are diagnosed with cancer in the UK.

Children and young people don’t usually suffer from the same cancers that typically affect adults, such as lung, breast and bowel cancer. Childhood cancers tend to occur in different parts of the body from adult cancers, they look different under the microscope and they respond differently to treatment. Several types of cancer, such as neuroblastoma and Wilms’ tumour, are unique to children.

Main types of childhood cancer: children aged 0-14 years
Great Britain 2001 to 2008
Based on data provided by National Registry of Childhood Tumours

One of the greatest medical success stories of the last century is the amazing growth in the survival from childhood cancer - more than three quarters of children diagnosed with cancer can now be treated successfully. But there is still much to achieve. Treatment is aggressive and short- and long-term side effects remain a crucial concern. It is vital that we continue to fund research into childhood cancer to improve diagnosis and treatment, reduce side effects and save more young lives.

That’s why your help and support is so important to us.

Kalem’s story

Kalem was diagnosed with non-Hodgkin lymphoma when he was 10 years old. He is now in remission.

“Kalem needed chemotherapy for six months and I watched my beautiful boy fade before my eyes, knowing that the treatment may kill him if the cancer didn’t.”

“I did what I had to do to give my precious son a fighting chance - what parent wouldn’t? We were one of 14 families on the ward and every one had a child with a different type of cancer.

“There were times when I thought Kalem wasn’t going to make it, but he beat his cancer and is still with us today.

Read Kalem’s story: www.childrenwithcancer.org.uk/kalem

“The work of Children with Cancer UK is so important to help other children win their fight.”
Vikki, Kalem’s mum

For more information about childhood cancer, please visit: www.childrenwithcancer.org.uk/childhood-cancer
**Funding life-saving research**

We are one of the UK’s leading funders of research into childhood cancer. By investing in pioneering research projects, we can enhance our understanding of childhood cancer and improve the outlook for young cancer patients.

**What we’ve done**
In 2012 we launched a £2 million call for proposals for research into any aspect of childhood cancer. We also set aside a proportion of these funds for innovative start-up projects costing up to £50,000. Out of this, seven new projects were funded at a total cost of £336,206. The remaining project proposals were scheduled for assessment and allocation of funding in early 2013.

We also joined forces with Great Ormond Street Hospital Children’s Charity in 2011 to call for proposals for new research aimed at improving treatments for childhood cancer. Out of this call, eight projects were awarded funding in summer 2012, at a combined cost of £1,572,231.

In April 2012, we hosted Childhood Cancer 2012, our third international scientific conference, to share and discuss research into the causes of childhood cancer.

For a full list of our grants, please see page 38.

“Thanks to your generosity, we have funded over 100 essential research projects over the last 25 years.

“With your support, we can continue to drive up survival rates for children with cancer and save more young lives.”

Professor Geoff Pilkington, Scientific Advisory Panel

---

**Beth’s story**

“My daughter Beth was diagnosed with acute lymphoblastic leukaemia in 2011 when she was four years old.

“She’s needed two intensive blocks of chemotherapy so far and has lost her hair twice, but has been coping really well. Beth is a really bright girl, and whilst she doesn’t know how serious leukaemia is, she knows she’s very poorly.

“Beth finishes treatment in September 2013. Though I am simultaneously looking forward to and dreading this time, for Beth’s sake we plan to embrace a return to normality and hope that the rest of her childhood is carefree.

“Thanks to research funded by Children with Cancer UK, survival rates for children with leukaemia have increased to 80%, but there is still so much more that needs to be done.”

Karen, Beth’s mum

Read Beth’s story: [www.childrenwithcancer.org.uk/beth](http://www.childrenwithcancer.org.uk/beth)

---

**What we’re going to do**
In March 2013, we completed assessment of the remaining 49 project grant proposals received under our 2012 call. Nine exciting new projects were awarded funding and we are confident that these will deliver real advances in the fight against a range of childhood cancers.

In early 2013, we allocated £2 million to fund project grants for research into childhood cancer. The call was issued in March and within this we have repeated the call for applications for start-up projects.

We also plan to strengthen our Scientific Advisory Panel to broaden our range of expertise. Professor David Walker and Professor Silvia Marino joined the Panel from 1st April 2013.
Funding life-saving research

Funding innovative new research
We aim to fund research projects to improve the outlook for children with cancer and help us to understand why children develop cancer in the first place.

Thanks to your support and generosity, we launched a £2 million call for proposals for research into any aspect of childhood cancer, including causes and treatment. As part of the call, we set aside a proportion of funds for innovative start-up projects, inviting applications for grants of up to £50,000 to help get promising new research off the ground.

We received 78 proposals in total, out of which 29 were for start-up funding. Following rigorous assessment, our Scientific Advisory Panel selected seven start-up projects for funding, at a total cost of £336,206. These important projects focus on a range of childhood cancers including leukaemia, Wilms’ tumour, sarcomas and brain tumours. The selection process for the remaining 49 project proposals was completed early in 2013.

Dr Marina Hughes
The drugs used to treat children with cancer can be associated with a variety of adverse effects, including heart muscle damage. We need to understand the full extent of this damage in order to develop strategies for the protection of children who are at risk.

In 2012 we awarded start-up funding of £49,877 for a project that we hope will enable doctors to assess cardiac damage more accurately in young patients.

Dr Marina Hughes, a cardiologist within the Cardiac MRI unit of Great Ormond Street Hospital, explains more:
"Anthracyclines are one of the most effective anti-cancer drugs available but unfortunately they have a variety of adverse effects including damage to the heart muscle. This can cause serious long-term health problems and, in some cases, heart failure and death.

"This funding from Children with Cancer UK will enable us to pilot new cardiac MRI to assess generalised heart muscle damage and measure heart function. We hope to demonstrate that these techniques can reveal damage that cannot be detected using conventional methods, enabling us to quantify heart muscle cell damage more accurately and predict poor heart function before heart failure occurs."

What difference will this make?
Once the value of these techniques is proven, they can be routinely used in the monitoring of children undergoing cardiotoxic chemotherapy at Great Ormond Street Hospital and around the UK.

This should help doctors to individualise chemotherapy according to each patient’s cardiac tolerance, minimising the risk of harm. It should also help to define long-term strategies for the identification and management of late cardiac effects.

Clara’s story
"I was diagnosed with acute myeloid leukaemia when I was four years old. I needed seven operations and four bouts of chemo - and was given a 50% chance of survival.

"I don’t have many side effects, although I did have a drug that could have possibly seriously damaged my heart, but thankfully, all I have is one slightly weakened heart wall. I went back for very regular check-ups and heart scans, but my five years came and went and never another trace! I still have regular check-ups and scans though.

"I will never ever forget how truly lucky I am to be alive and I am grateful everyday."

Clara, cancer survivor, aged 16

Funding life-saving research

Improving treatments for children with cancer

We work very closely with the team at Great Ormond Street Hospital, where one in every 10 children diagnosed with cancer is treated.

In 2011 we worked with Great Ormond Street Hospital’s Children’s Charity to launch a funding call for research aimed at improving treatments for childhood cancer.

Following a rigorous review process, eight projects from a total of 33 applications were awarded funding in summer 2012.

These eight projects are concerned with a broad range of childhood cancers including leukaemia, brain tumours, neuroblastoma and rhabdomyosarcoma.

“Around 70 children are diagnosed with rhabdomyosarcoma every year in the UK. It is the most common type of soft tissue sarcoma to occur in childhood.”

Dr Janet Shipley

Through our joint funding call with Great Ormond Street Hospital Children’s Charity, Dr Janet Shipley from the Institute of Cancer Research in London successfully applied for funding of £227,368 to take forward the development of new treatments for rhabdomyosarcoma.

Dr Shipley is an internationally recognised expert in childhood rhabdomyosarcoma. She explains: “Rhabdomyosarcoma is a major cause of death from cancer in childhood. It remains difficult to treat, particularly in patients with disease that has recurred or spread.

“Despite rigorous clinical trials, there has been no significant increase in survival in the last three decades and new treatment approaches are desperately needed. We are investigating a new way of treating rhabdomyosarcoma that we hope will be more effective than current treatments.

Read more: www.childrenwithcancer.org.uk/janet-shipley

What difference will this make?

Ultimately, we hope that this work will result in the adoption of a new, more effective drug into the standard treatment of patients with rhabdomyosarcoma to save children who are failed by existing therapies.

Ross’s story

“At just 18 months old, Ross was diagnosed with orbital rhabdomyosarcoma - a rare soft tissue cancer that developed in his eye. He started treatment straight away but after three cycles of chemotherapy, the cancer was not responding. We were told he needed radiotherapy.

“As Ross was so young, the side effects would have been severe, so we researched other treatments. After receiving NHS funding and approval, Ross had treatment in the USA which wasn’t available in the UK. In June 2010, we heard the fantastic word - remission!

“Ross will have lifelong eye issues and probably some growth problems but hopefully nothing requiring surgery.

“But he’s still here, he survived and every day I am so, so thankful for that and I pray every day that it doesn’t come back.”

Lesley, Ross’s mum

Read Ross’s story: www.childrenwithcancer.org.uk/ross

www.childrenwithcancer.org.uk
Funding life-saving research

Childhood Cancer 2012
Childhood Cancer 2012 was our third international scientific conference and our first as Children with Cancer UK. Focussing on the causes of childhood cancer, more than 150 delegates from around the world joined us for this important event in Westminster, London in April 2012.

During the three day event, more than 20 international experts presented work across a wide-range of topics relevant to the causes of childhood cancer including air pollution, parental smoking, pesticide exposure, genetics and diet.

Quite incredible progress has been made in the treatment of childhood cancer in recent decades. However, despite these advances, there are significant gaps in our understanding of the causes of childhood cancers and the risk of children developing some types of cancer has increased. There is an urgent need to find out more about what causes cancer and develop new therapies to save more children.

All sessions were live-streamed to reach as wide an audience as possible. Videos of the sessions are also available on the conference website: www.childhoodcancer2012.org.uk

What difference will this make?
By bringing together scientists from around the world, our conferences enable the exchange of knowledge and information, helping to advance our understanding of childhood cancer.

We hope that Childhood Cancer 2012 will stimulate fresh research into the causes of childhood cancer, forge new international collaborations and help shape a research agenda for the future.

To find out more about our conference, visit www.childrenwithcancer.org.uk/childhoodcancer2012

“Wilms’ tumour is one of the most common types of childhood cancer, affecting around 85 children a year in the UK.”

Niamh’s story
“My little girl Niamh was diagnosed with Wilms’ tumour - a type of kidney cancer - when she was six years old.

“The tumour was so large that it was pushing her heart, spleen and abdomen. It had spread to her lungs and we were told that she had 60-70% odds of survival.

“Niamh has been a real fighter throughout her treatment and we are so glad that Children with Cancer UK is putting so much money towards funding research.

“Niamh is continuing to battle through it all but thanks to on-going research, the treatments are improving and we have hope.”
Gilli, Niamh’s mum

Read Niamh’s story: www.childrenwithcancer.org.uk/niamh

Encouraging the researchers of the future
We are keen to encourage talented young scientists to progress their careers in childhood cancer research. Six young researchers (under 30 years of age) who presented research at the conference were awarded total funding of £100,000 to help further their investigations in the childhood cancer field.

Children with Cancer UK Annual Review 2012
Funding welfare projects

Finding out that your child has cancer marks the start of a long and difficult journey for the whole family. We fund essential welfare projects to provide practical support for children with cancer and their families.

What we’ve done
In 2012 we continued our partnership with CLIC Sargent, granting £200,000 to provide financial assistance to families whose children are being treated for cancer, through ‘Paul’s Fund’.

We also work with a number of children’s hospices to help families facing the loss of a child. We provided funding of £180,000 to Together for Short Lives, enabling them to support children with life-threatening and life-limiting conditions. We provided funding of £60,000 to Shooting Star Chase to provide practical and emotional support for families in West London, Surrey and West Sussex. We also awarded £60,000 to Lifelites, providing fun and educational technology for children who stay, play and learn in children’s hospices across the UK.

A significant grant of £1.5million was awarded to the Paul O’Gorman Lifeline to support their valuable work in helping children with cancer in Eastern Europe.

What we’re going to do
We will continue to work with our charitable partners and hospices to help provide better care for children and young people with cancer and their families. We will fund an important project in Northern Ireland with CLIC Sargent, to provide a home from home for children with cancer and their parents. We will also once again hold our successful Zippos Circus event for children suffering from cancer and their families.

Paul’s Fund
When a child is diagnosed with cancer, it is a frightening experience for the whole family. Treatment normally starts immediately, is often given many miles from home and can last for up to three years. This can place a considerable financial burden on a family.

Thanks to your support and through Paul’s Fund, we were once again able to help CLIC Sargent provide financial support to help families deal with the financial impact of cancer.

Jack’s story
Jack was diagnosed with leukaemia a few weeks before his third birthday. He started his chemotherapy immediately and was in hospital for five weeks having treatment.

His mum, Gayle, says: “It was costing me about £40 a day in food and other costs while he was on the ward, so receiving a financial grant from CLIC Sargent just after Jack was diagnosed was a real lifeline.”

Lorraine Clifton, Chief Executive at CLIC Sargent, says: “Our CLIC Sargent Care Grants provide both immediate and long-term support to all families in need, as and when they need it. It is because of the continued generosity of Children with Cancer UK and their supporters that we have been able to serve so many families through our grants service. Thank you.”
Raising awareness

Cancer kills more children in the UK than any other disease. By raising awareness of childhood cancer, we can protect and save more young lives - today and in the future.

What we’ve done
In 2012 we continued to raise awareness of childhood cancer in Parliament, working with a range of campaigning groups to enlist support from politicians.

We continued to develop our websites to increase our online presence. Nearly 230,000 unique visitors accessed information about childhood cancer, research or fundraising during 2012.

We also increased communication with supporters through facebook, twitter and email newsletters.

What we’re going to do
In January 2013, we held a special reception at the House of Lords to launch our 25th anniversary celebrations. Hosted by Lord Willis of Knaresborough, the event was a huge success and was attended by patient families, researchers, MPs and Peers, fundraisers and other key stakeholders.

In June we will host a reception focussing on the successes of our research programme such as the significant increase in survival rates and the improvements to children’s treatments that offer them a better quality of life.

This event will also give scientists, researchers and doctors a forum to discuss the advances needed in the next 25 years to fight this dreadful disease and an opportunity to thank our supporters directly.

We will also continue to raise awareness of childhood cancer through online, mobile and social media campaigns.

Read Elizabeth’s story: www.childrenwithcancer.org.uk/elizabeth

www.childrenwithcancer.org.uk

Dear children with cancer uk,

My name is Elizabeth Rysdale and I am eight years old. I had cancer when I was a baby. I remember when I was in hospital a lot and I had a tube up my nose. I now feel much better but I have to have a check up once a year.

I went to the House of Lords to celebrate the 25th anniversary of children with cancer and I went to a circus as well. I really enjoyed the circus especially the horses.

Thank you for inviting me.

Love from Elizabeth xxx
Fundraising highlights

We receive no government funding and rely entirely on voluntary donations to continue our essential work. In 2012, we continued to develop our fundraising activities and are pleased to report a rise in income to almost £12 million. This increase has been driven by sustained growth in our direct marketing and running events.

“Your support is priceless and deeply appreciated. On behalf of the children who have already benefited from your generosity, we thank you sincerely for all you have helped us to achieve to save young lives. Together, we can help more children with cancer.”

Linda Robson, Trustee

The following pages feature just a handful of stories from supporters who have helped to raise essential funds for Children with Cancer UK in 2012. Thank you.
Fundraising highlights

Our fundraising appeals

During 2012 our fundraising appeals helped us to reach over three million homes across the UK. Thanks to new and existing supporters, over £5 million was donated to help us continue the fight against childhood cancer - nearly 40% of our income.

Our Celebrity Friends continued to support our appeals. We are extremely grateful to comedian Russ Abbot for heading up our summer appeal, to actresses Pauline Quirke and Linda Robson (our Trustee) for launching our summer raffle and to Chris Tarrant for launching our Christmas raffle.

To attract further supporters, we launched new online and mobile fundraising activities. We developed a microsite encouraging supporters to write and share an online Christmas message for a small donation. We launched a new online shop to sell Christmas cards and gift wrap, helping to increase sales by 62%. In addition, we made it easier for our supporters to make a donation, by providing a new text to donate number which raised nearly £17,000.

Helping future generations

Since we began in 1988, we have received over £6 million in gifts left to us in Wills or in memory of a loved one. These kind donations have allowed for us to fund ground-breaking research and welfare projects to help more children with cancer.

Making a Will gives you the chance to let your family and friends know how much you care for them. Once you have provided for your loved ones, you can also choose to support charities with any assets that may remain.

Norman’s story

“My granddaughter Maeve was diagnosed with leukaemia in 2004 when she was 12 years old. She had a stem cell transplant from a donor in Germany as no match could be found in the UK. In spite of missing nearly a year of school because of the severe treatment at the Royal Marsden Hospital, she did extremely well to catch up with her studies and is now studying medicine at Leeds University.

“In recognition of the wonderful work done by Children with Cancer UK, I make an annual donation of £50 out of my pension and have chosen to leave a gift of £10,000 to the charity in my Will.”

 Norman Graham

2013 and how you can help

Throughout our 25th year, we will continue to develop our fundraising appeals through traditional postal appeals and new digital channels. We will also work with the Free Wills Network to encourage more supporters to leave a legacy to Children with Cancer UK in their Will.

To be added to our mailing list, please send your details to contactus@childrenwithcancer.org.uk or sign up to our email newsletter at www.childrenwithcancer.org.uk

“By kindly leaving a gift in your Will, you can help us save even more young lives.”

Leaving a gift in your Will to Children with Cancer UK can help us to plan ahead and fund research to benefit future generations. To find out more, visit www.childrenwithcancer.org.uk/will or call us on 020 7404 0808.
Fundraising highlights

Running and challenge events
In 2012 thousands of individuals went the extra mile on foot or by bike, across the globe, raising over £3 million to help save young lives.

- The Virgin London Marathon was our most successful running event ever, with 1,295 runners raising close to £2,350,000.
- 566 runners chose Children with Cancer UK as their charity after securing their own place in runs up and down the country, raising over £100,000.
- 68 cyclists supported us through the Great Manchester Cycle raising over £7,500.
- Over £50,000 was raised by cyclists taking part in the London to Paris bike ride.
- A team of 46 completed the Nightrider™ cycle event raising over £12,000.

Gillian’s story
In 2012, Gillian ran the Virgin London Marathon, several half marathons and cycled from London to Paris.

“I’ve supported Children with Cancer UK since 2009. I run in memory of my friend’s little boy, Henry, who was diagnosed with leukaemia when he was nine months old.

“No other families should have to suffer the loss of a child. Henry is always with me when I run my races and I wear my Children with Cancer UK vest with absolute pride.

“I just pray that one day a cure is found. I would feel proud to have been a part of making that happen.”

Gillian Clason

2013 and how you can help
We have many exciting events planned for 2013. Our Virgin London Marathon team will be running 25,000 miles to help celebrate our 25th anniversary, and we’ll be promoting new cycling challenges including RideLondon - Surrey 100.

To take part in a running event, bike ride or trekking challenge, visit www.childrenwithcancer.org.uk/support-us
Fundraising highlights

Corporate partnerships
During 2012 numerous corporate partners from a range of industries supported our essential work, raising almost £600,000.

- Organisations including Segro, Navigant and Insight selected us as their Charity of the Year, committing to raising money and awareness through staff events.
- Both Deloitte and Lombard extended their corporate partnership until 2013.
- We were thrilled to be chosen by high street retailer Toys "R" Us to benefit from the sale of their new charity bags.
- One Aldwych - London’s definitive contemporary luxury hotel - selected Children with Cancer UK to benefit from a ‘Pound on the bill’ initiative.

NISA
We are extremely grateful to Nisa and its Making a Difference Locally (MADL) charity for their continuing support and generosity. Nisa has been supporting us since 1990 and more recently through its MADL campaign.

John Sharpe, MADL board member, says: “Since 2010 MADL has donated £25,000 each year to Children with Cancer UK. We encourage participating Nisa stores to embed themselves within their communities by raising money in store and making donations to local good causes which they are able to do through MADL. We also make a number of large donations to national charities each year, such as these £25,000 donations to Children with Cancer UK. These donations will help Children with Cancer UK to determine the causes, find cures and provide care for children with cancer.”

Ace’s story
“My son Ace was three years and three months old when he was diagnosed with acute lymphoblastic leukaemia.

“We were coming to the end of the three and a half years of treatment and I started tallying up how much medicine Ace was taking - 180 doses every four weeks, including steroids, medicine to help with side effects and all the chemotherapy drugs.

“We had a tick sheet on the chemo cupboard door to keep track.

“We are one of the lucky ones. Our son made it and a few years ago not many children did.”
Ian, Ace’s dad

2013 and how you can help
Support from corporate partners continues to grow and we have won some exciting new Charity of the Year partnerships for 2013 including Igloo Books and Majestic Wine Warehouse.

If your company has a Charity of the Year scheme please nominate us so that we can work together. You can also help our charity directly through payroll giving.

To find out more about corporate opportunities with Children with Cancer UK, please visit www.childrenwithcancer.org.uk/corporate
Fundraising highlights

In the community
In 2012, 653 people raised close to £300,000 to help fund our work - that's nearly £500 each! Whether it's organising a boot fair, running a bake sale or collecting at supermarkets, every penny makes a difference.

2013 and how you can help
To celebrate our 25th anniversary in 2013, we will launch a new community fundraising initiative - the Children with Cancer UK Bake Club.

We will develop RAG (Raise and Give) fundraising with University students and hope to welcome more volunteer Charity Champions to support fundraisers and raise awareness of our work in local communities.

To find out more about fundraising in your local community, visit www.childrenwithcancer.org.uk/fundraising

A fundraising triumph
Club Triumph organised a Round Britain Reliability Run in October 2012 and chose Children with Cancer UK as their benefiting charity for the third year. More than 100 cars and drivers took part, raising over £65,000.

“The money raised for Children with Cancer UK certainly pleased all that were involved in the organising team and exceeded all expectations of Club Triumph, in such a sincerely wonderful event. In this instance, we certainly lived up to the Club motto... ‘The Club That Does’.”

Mike Charlton, Club Triumph

A day out at Zippos Circus

Thanks to supporters donating over £250,000 towards our welfare appeal, we hosted a special event with Zippos Circus in September 2012.

Around 250 guests - all families of children with cancer - enjoyed a special performance of Zippos Circus, as a well-deserved break from treatment and to celebrate remission.

Comments from some our guests posted on our facebook page

Amanda Blair: We had an amazing time yet again. Can’t thanku enough 4 a wonderful day! The Blairs xx

Claire Groombridge: We all had a wonderful time, thank you for all your hard work.

Becca Newlyn: We had such a lovely time! Thank you so much for inviting us x

Claire Everett: We had a great time. Thank you for inviting us! :) x

Kathi Palitz: First time at the circus for our girls too - they loved it! The goody bags are amazing, thank you so much for a very memorable day!

Dianne Walker: It was a brilliant day from start to finish and I felt very honoured to be a part of it. xx

Julie Leedham: Thank you for a really memorable day. Jake loved every minute. :)

Watch our video from Zippos Circus and read a full review at www.childrenwithcancer.org.uk/zippos-circus-day
Fundraising highlights

Special events
Our special events are hugely popular and raised nearly £700,000 in 2012. An enormous thank you to our celebrity friends, guests, committee members and volunteers who helped to make our events such a success.

Opera evenings
We have held our opera evenings for 21 years, raising over £800,000 to date. In 2012, our opera evenings raised more than £100,000 over two nights, an increase of more than 14%.

Through the rain or shine of an English summer, the evening always delights guests.

Children with Cancer Ball
We held the Children with Cancer Ball in November, raising nearly £470,000.

Thank you to Michelle Mone, Russ Abbot, Jeff Banks and Bobby Davro for helping to make the evening so much fun.

This year the Grand Auction raised a fantastic £200,000. The biggest prize of the night was the generous donation of dinner for 10 people to be cooked by Paul Young, James Martin and Paul Hollywood accompanied with wines by Olly Smith. The successful bidder paid £21,000 for this unique treat.

Tarrant’s Quiz Party
Over 400 guests joined Chris Tarrant for our annual Quiz Party in May, raising over £120,000. Celebrity guest and British boxer Michael Watson MBE kindly signed two pairs of boxing gloves on the spot, raising a terrific £3,500.

“None of us really knew quite what to expect when it came to the Quiz Party. We spent the entire night laughing from our bellies and having an absolute blast! We all enjoyed it so much, it has now become an annual event for our group and we are already looking forward to the next one!!”

Dave Sissens, guest and fundraiser

2013 and how you can help
Our calendar of events for 2013 provides a great opportunity to raise money and have fun. Whether you would like to buy tickets, donate items for the auctions, join a committee or volunteer on the night, we’d love to hear from you.

Children with Cancer UK Annual Review 2012
Thank you

The wonderful work that you have read about in our Annual Review would not have been possible without the generosity of the many individuals and organisations that support us each year.

It is thanks to the thousands of volunteers, donors and supporters giving their time, energy and money that we can continue the fight against childhood cancer and save even more young lives.

Many families have kindly shared their personal experiences to help us raise awareness of childhood cancer - we would like to say a heartfelt thank you to each and every one of you. We are humbled by your courage and compassion.

On behalf of the children you are helping, we would like to extend a warm thank you to all of our much-valued supporters. These include:

- Our corporate and trust supporters, with a special thanks to Business Traveller, Deloitte, Dragon Sale, GiveaCar, Give as you Live™, Ink Jungle, Insight, KBC Investments, Lombard, Navigant, Nisa, One Aldwych, Phoenix Group, Prada Retail, Rathbones, Segro, Stockshop and Toys “R” Us
- Our dedicated special event committees: Syon Committee chaired by Margrete Hargreaves-Allen and Lady Julia Craig Harvey; Quiz Committee chaired by Mick Keating; Ball Committee chaired by Rob Templeman, plus all event volunteers, generous guests and everyone who donated a prize for our auctions
- Our loyal and energetic network of fundraisers working hard in their local communities, especially Club Triumph and our Charity Champions
- Our energetic cheering teams who have joined us on race days
- Our post-Virgin London Marathon recovery team of medics, masseurs, podiatrists and physiotherapists especially Dr Chris Buswell
- Zippos Circus and Martin Burton
- Cos Onisiforou at Fare for providing wonderful food and drink for families and runners at Zippos Circus and our Virgin London Marathon reception
- All those who have worked on our campaigns to highlight the possible dangers of harmful environmental exposure and to promote precautionary measures, including our supporters in the House of Commons and the House of Lords
- Everyone who has made a commitment to support Children with Cancer UK through a regular gift or leaving a legacy - your support will help us to plan ahead in the fight against childhood cancer
- Our celebrity friends for continuing to support our work in so many ways
- Our Scientific Advisors including the many external reviewers who have helped assess funding proposals during the year
- RealBuzz, Nova International and Virgin London Marathon staff
- Our team of office volunteers who provide invaluable support to our small team
- And finally, everybody who works for Children with Cancer UK. Their commitment and passion ensures that we can continue to support researchers, families and fundraisers to the highest of levels.

Tildy’s Trust

We would like to give a special thank you to Tildy’s Trust for their continued support. The Trust has generously donated £150,000 to Children with Cancer UK over three years to help fund research projects into the prevention and treatment of childhood leukaemia.

Tildy’s Trust was set up to raise money to fight childhood and teenage leukaemia. Tildy Curran was diagnosed with leukaemia in 2008 and fought the disease with incredible bravery and determination for two and a half years. She relapsed just two weeks from the end of her treatment and died on 29th September 2010, aged 14.
Charity details

Children with Cancer UK was set up in memory of Paul O’Gorman who died on 6th February 1987 and his sister Jean, who died on 3rd November 1987.

The charity was inaugurated by Diana, Princess of Wales on 12th January 1988 at Mill Hill County High School where Paul had been a pupil.

Mill Hill County High School where Paul had been a pupil.

Scientific Advisors

Children with Cancer UK Scientific Director: Emeritus Professor Denis L. Henshaw BSc, PhD

We are greatly indebted to the hundreds of specialist peer reviewers worldwide and in particular our Scientific Advisors who freely give their time and expertise to help drive forward our fight against childhood cancer.

Research into childhood cancer is ever expanding and we aim to recruit in 2013 additional specialists to provide further expertise in key areas.

Professor Jillian Birch BSc, PhD, Professor of Cancer Studies and Director, CRUK Paediatric and Familial Cancer Research Group, University of Manchester

Professor Pat Boffler PhD, MPH, Professor of Epidemiology, University of California, Berkeley

Dr Nicholas Goulden MB, ChB, MRCP, FRCPath, PhD (Chair). Consultant in Paediatric Haematology and Bone Marrow Transplantation, Great Ormond Street Hospital for Children

Professor Silvia Marino MD, FMedH-path, Professor of Neuropathology and Honorary Consultant Neuropathologist, Blizard Institute, Barts and the London School of Medicine, Queen Mary University of London

We are a member of the Association of Medical Research Charities. It sets standards of good practice to which member charities must adhere in their grant-making, including policies on peer review.

We are also a member of the National Cancer Research Institute which is a UK-wide partnership between the government, charity and industry. It promotes co-operation amongst its member organisations for the benefit of patients, the public and the scientific community.

Report by the trustees on the Summarised Financial Statements

The above summarised financial statements are extracted from the full statutory trustees’ annual report and financial statements which were approved by the trustees and signed on their behalf on 20 June 2013. The full financial statements, on which the auditors Crowe Clark Whittill LLP gave an unqualified audit report on 12 July 2013, will be submitted to the Charity Commission and to the Registrar of Companies.

The auditors have confirmed to the trustees that, in their opinion, the summarised financial statements are consistent with the full financial statements for the year ended 31 December 2012.

These summarised financial statements may not contain sufficient information to gain a complete understanding of the financial affairs of the charity. The full statutory trustees report, financial statements and auditors’ report may be obtained from Children with Cancer UK, 51 Great Ormond Street, London WC1N 3JQ or www.childrenwithcancer.org.uk

Signed on behalf of the trustees on 20 June 2013.

The Earl Cadogan DL
Trustee

Eddie O’Gorman OBE
Trustee

Children with Cancer UK Annual Review 2012
Grants to third parties

Research into prevention and causes

£

Dr Patrick Case, University of Bristol
Project grant: Could signalling between placenta and fetus provide a first hit for childhood leukaemia?
99,844

Childhood Leukaemia International Consortium (CLIC)
To fund the CLIC Environmental Interest Group, Genetic Interest Group and Infection and Immunity Interest Group workshops in London in 2012.
30,000

Dr Chris Tan, University of Nottingham
Childhood Cancer 2012 poster prize.
20,000

Dr Andrea Lazenby, University of Bristol
Childhood Cancer 2012 poster prize.
20,000

Lucy Young, UCL Cancer Institute
Childhood Cancer 2012 poster prize.
20,000

Daphne Chen, University of Manchester
Childhood Cancer 2012 poster prize.
20,000

Sanne van Otterdijk, Newcastle University
Childhood Cancer 2012 poster prize.
10,000

Masaaki Sunaoshi, National Institute of Radiological Sciences, Japan
Childhood Cancer 2012 poster prize.
10,000

Professor Denis Henshaw, University of Bristol
Underspend on programme grant awarded in 2008.
(6,307)

Dr Ole Raaschou-Nielsen, Institute of Cancer Epidemiology, Denmark
Underspend on project grant awarded in 2008.
(2,983)

Dr Lyndal Kearney, University of Cambridge
Underspend on project grant awarded in 2008.
(1,589)

Professor Vaskar Saha, University of Manchester
Project grant: Optimisation of the use of L-Asparaginase and Dexamethasone in childhood acute lymphoblastic leukaemia.
140,611

Dr Janet Shipley, Institute of Cancer Research
Project grant: Preclinical testing of FGFR inhibitors for the treatment of rhabdomyosarcoma.
113,684

Professor Rob Mairs, University of Glasgow
Project grant: Assessment of [131]MBG in combination with cytotoxic drugs for neuroblastoma therapy.
79,429

Dr Andrew Stoker, UCL Institute of Child Health
Project grant: Combination treatments to drive neuroblastoma differentiation and senescence.
69,244

Professor Nicholas Coleman, University of Cambridge
49,920

Professor Tariq Enver, UCL Cancer Institute
Preclinical testing of FGFR inhibitors for the treatment of rhabdomyosarcoma.
113,684

Project grant: Assessment of [131]MBG in combination with cytotoxic drugs for neuroblastoma therapy.
79,429

Dr Daniel Williamson, Newcastle University
Start-up grant: Functional genomic profiling of hSNF5/INI1 inactivation in malignant rhabdoid tumours.
49,867

Dr Keith Brown, University of Bristol
Start-up grant: Epigenetic deregulation of splicing factors in childhood cancer.
49,616

Dr Thomas Milne, University of Oxford
Start-up grant: Epigenetic mechanisms of MLL-AF4 leukemogenesis.
48,104

Mr Craig Gerrand, Newcastle upon Tyne Hospitals NHS Foundation Trust
47,614

Dr Ian Hampson, University of Manchester
Start-up grant: A novel approach for the identification of serum antibodies with diagnostic/prognostic and/or therapeutic potential for childhood acute lymphoblastic leukaemia.
47,605

Dr Mark Pearce, Newcastle University
Start-up grant: Psychosocial health outcomes after childhood cancer - pathways from initial survival to long-term survivorship.
43,523

Dr Juan Pedro Martinez-Barbera, UCL Institute of Child Health
Project grant: Development of novel chemical therapies against the paediatric form of human craniopharyngioma.
39,576

Dr Nicola Cooper, UCL Institute of Child Health
Underspend on project grant awarded in 2008.
(1,589)

Dr Anjali Shah, University of Oxford
Underspend on project grant awarded in 2009.

For a full breakdown of our grants to third parties, please download our full financial report and accounts at www.childrenwithcancer.org.uk/annualreview2012
Please help fight childhood cancer and save more young lives

Your £25 donation can help to fund research for more targeted, less toxic treatments for children.
Your £50 donation can help to fund research to give more children with poor prognosis increased survival rates.
Your £100 donation can help to fund research to save more children with high-risk cancer and reduce the devastating side effects of the current available treatments.

“Just like any other parent I don’t want to see my Vega suffer. I also don’t want her to die from cancer and we are faced with a cure that is as nasty as the disease. I dream about the future, when all of this is over, when Vega is well.” Kathi, Vega’s mum
